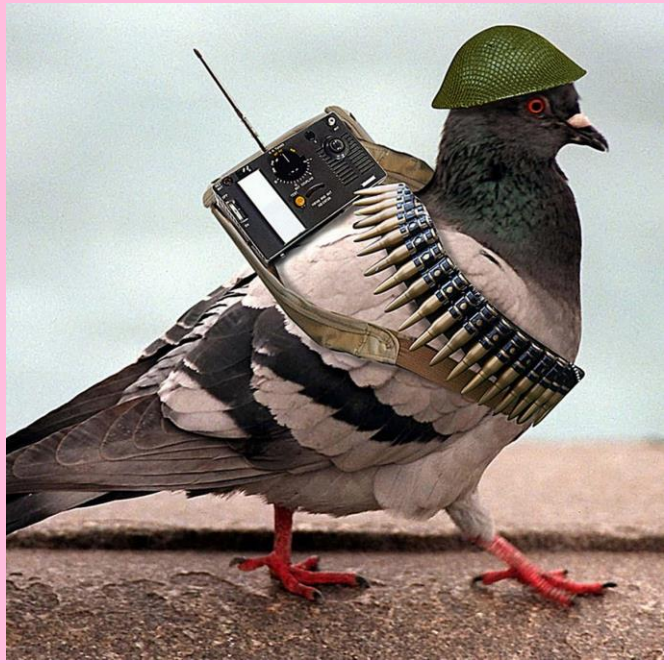
OSINT

What is OSINT?

Open Source Intelligence (OSINT) is the practice of gathering, analyzing, and disseminating information from publicly available sources to address specific intelligence requirements.

(glorified stalking)

The concept of OSINT originated in military intelligence settings where it was used for espionage and strategic intelligence through media like newspapers and radio broadcasts.



It is more so now referred to as “internet stalking” or “an invasion of privacy” BUT I SWEAR IT IS ALL PERFECTLY LEGAL AND PUBLICALLY AVAILABLE INFORMATION

Collecting Various Forms of Information

What Is Considered Sensitive Personal Information?

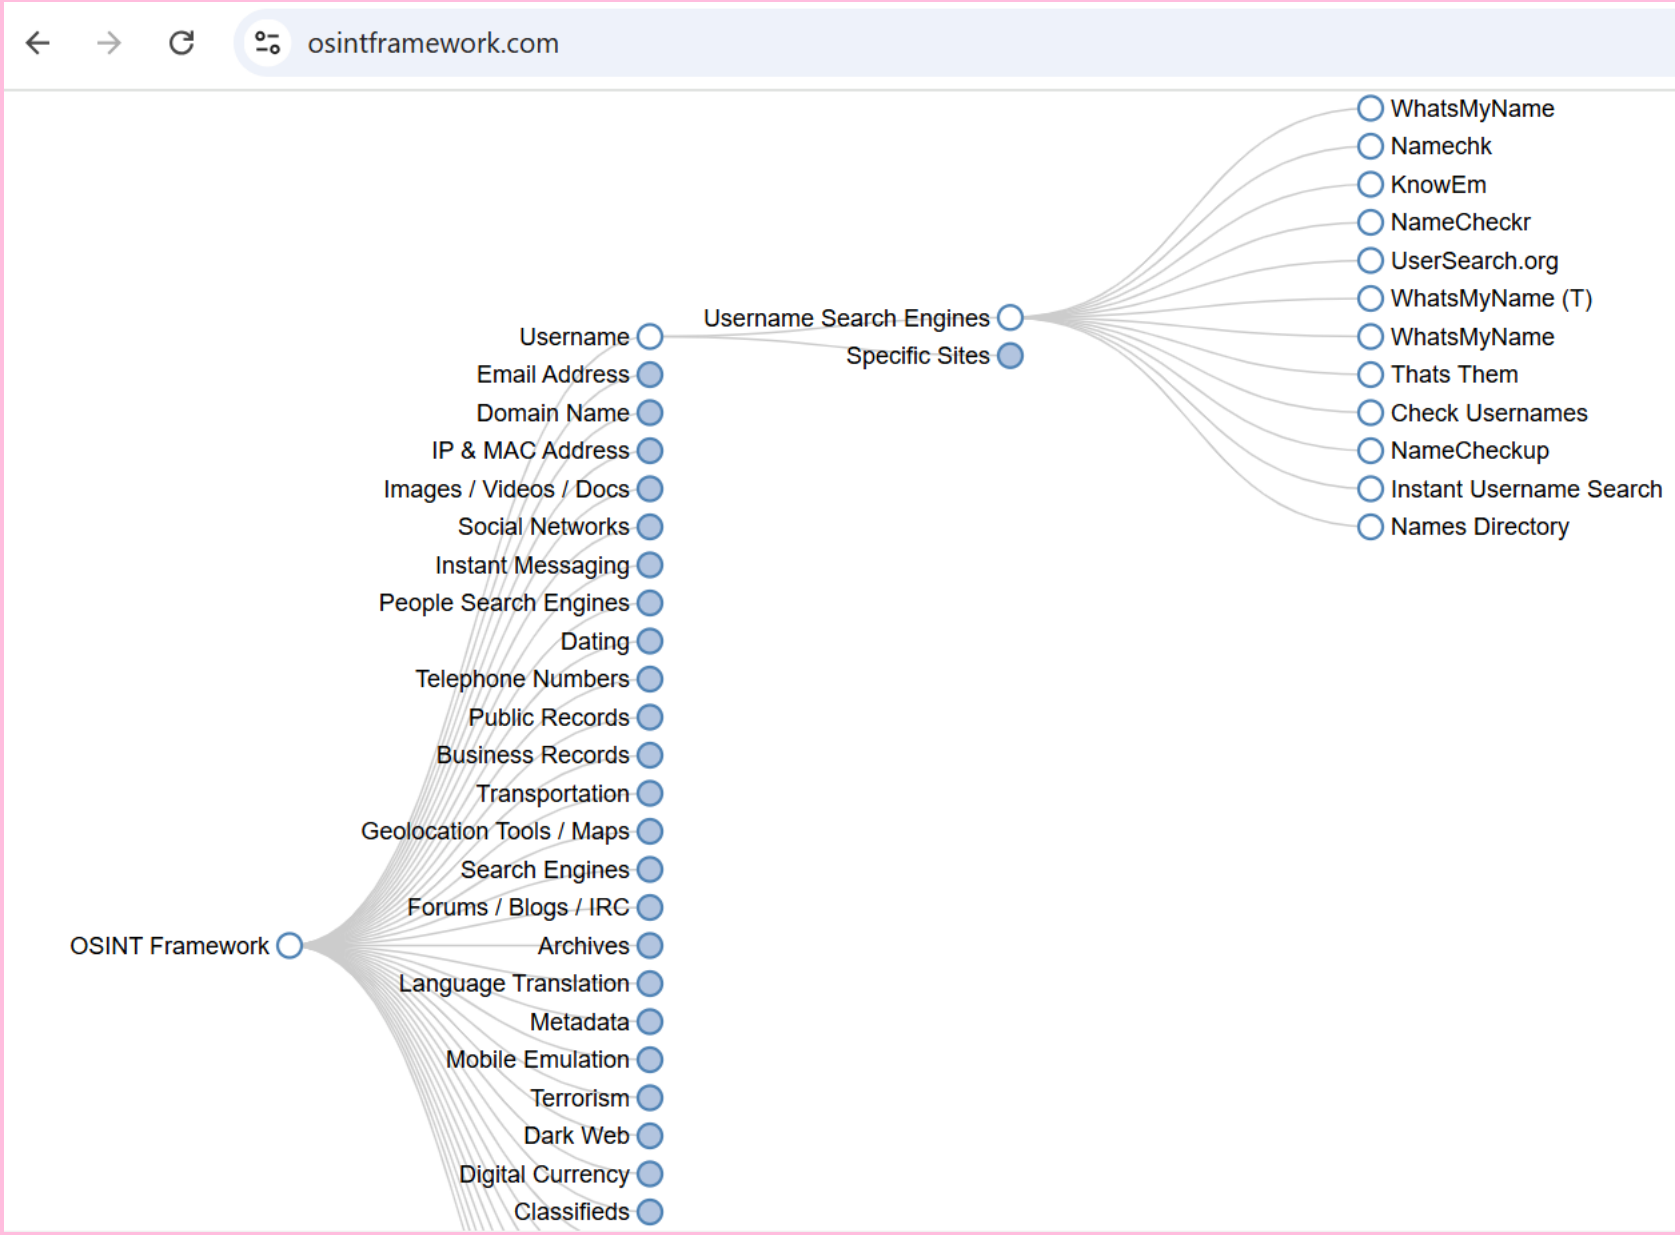
Everything is conveniently categorized into neat little categories to help you narrow down based on your needs/ current information possessed. :3



What Is Google Dorking?

A technique that utilizes advanced search operators to uncover information on the internet that may not be readily available through standard search queries.

While Google Dorking can reveal sensitive information if it’s publicly accessible, using this technique doesn’t breach any laws or Google’s terms of service.
